
The Peace Manifesto

I'm sick and tired of the culture of war,
so I give my support to the culture of peace,
and I will keep spreading the word
on social media until we win

website: <https://activatingpeace.org>

The overall goal is to establish a popular movement for the **culture of peace** linked by social media around the world that is ready to transform global governance when the present system of governance controlled by the billionaires collapses in a global economic crash

The strategy is to make the **Peace Manifesto 2025** viral in all social media (Facebook, Instagram, Twitter, LinkedIn, WhatsApp, Telegram, Bluesky, V Kontakte, Tencent Qq, Weibo) to the point that millions of people are engaged around the world

The tactics:

1. establish *Activating Teams* of 2 or 3 youth and students who support each other in regular contact to continue pumping out **Peace Manifesto** posts by social media to their media friends and networks on a regular basis for a long-term, urging them to repost in order to make the **Manifesto** viral. Posting the Manifesto should require about two hours a month.

2. *Activating Teams* should be established in all regions of the world.

3. establish a communication system (by WhatsApp and email) linking the all of the *Activating Teams* to each other and to *The Peace Manifesto Team* in order to exchange news of what works and what does not work, and suggestions of how to improve the tactics and strategy. We already have a WhatsApp number for this: <https://chat.whatsapp.com/HOUBz1ogG5oL02uFeoTQzt?mode=wwt>

At *The Peace Manifesto Team*, we have finalized a Certificate of Achievement to be signed by *The Peace Manifesto Team* and sent to each *Activating Team* once it has begun work.

We would appreciate your involvement in this process as an *Activating Team*, and we look forward to working with you on this important initiative. More than ever, the world needs a popular movement for the culture of peace.
